Cloud Computing Training Syllabus

SLA is one of its kind Institute which not only equips you in technology skills but will train you for free in Aptitude skills, Soft Skills, Mock Interviews, Interview Skills, Work ethics and Corporate Values that you need to know to get into IT Industry. Our training is given by expert real time development experienced trainers and we enable each and every student of ours to do their own real time projects by the end of the program.

We do not buy you a job by bribing companies to secure a place in IT, instead we equip you with the skills needed to get employed in IT and will support you with unlimited number of relevant interview opportunities so that your career in IT becomes assured. Our support will be there until you get placed in an IT Company as that's our mission too.

If you want to just have an IT certification, you can do your course anywhere. If you aspire to get into an IT Job, then you should choose SLA. With SLA, your IT dream will definitely come into reality.

Please go through the long list of our student reviews / offer letters @ www.joinsla.com to get to know more about us.

Defining cloud computing

- ❖ Components of a computing cloud
- ❖ Differentiating types of clouds: public, private, hybrid

Delivering services from the cloud

- ❖ Categorizing service types
- ❖ Comparing vendor cloud products: Amazon, Google, Microsoft and others

Adopting the Cloud

Key drivers of cloud computing solutions

- ❖ Instantaneous provisioning of computing resources
- ❖ Tapping into an infinite storage capacity
- ❖ Cost-effective pay-as-you-use billing models

Evaluating barriers to cloud computing

- ❖ Handling sensitive data
- ❖ Aspects of cloud security
- ❖ Assessing governance solutions

Exploiting Software as a Service (SaaS)

- ❖ Streamlining administration with centralized installation
- ❖ Optimizing cost and performance with scale on demand

Comparing service scenarios

- ❖ Improving collaboration with business productivity tools
- ❖ Simplifying business process creation by integrating existing components

Inspecting SaaS technologies

- ❖ Deploying web applications
- ❖ Implementing web services: SOAP, REST
- ❖ Choosing a development platform

Delivering Platform as a Service (PaaS)

Exploring the technical foundation for PaaS

- ❖ Specifying the components of PaaS
- ❖ Analyzing vendor PaaS provisions
- ❖ Selecting an appropriate implementation
